

# D2

## APPLIANCE™

The D2 distalizing appliance was developed to simplify treatment of Class II cases during the initial stage of treatment. The patented D2 design treats to a Class I platform by the intra oral elastics forces. Molars are distal rotated into their desired position. Take advantage of early treatment patient cooperation. Brackets can be placed during or after the Class I correction is completed.

### FEATURES & BENEFITS

- One size fits all to greatly reduce your inventory
- Low profile design for greater patient comfort
- For bilateral or unilateral case treatment
- Simple to use and easy to place
- Reduce overall treatment time
- Patented for both Class II and Class III treatment

#271-600

Treat your Class II Aligner cases  
with fewer Aligners
